

*Ada Twist, Scientist* by Andrea Beaty

Ada Twist is one VERY curious kid. She is *constantly* asking why, what, how, and when! So she starts working on experiments to figure things out. With, let's say, interesting results. This is a fantastic book for a budding scientist or anyone with an inquisitive mind, with a great young role model in Ada. She doesn't just rely on adults to answer her questions; she does her best to figure things out for herself. The rhymes are fun, the art is beautiful, and it's got a great message. I also loved that this features other characters from Beaty's *Questioners* series. You don't have to read the picture books in order, they all stand on their own. This is a wonderful read aloud book for bedtime, one that has been read over and over and over again in our house.
