

*Beholding and Becoming: The Art of Everyday Worship* by Ruth Chou Simons

Beautiful artwork done in watercolors with inspiring familiar hymns and quotes made this book read like a comforting, warm embrace. I could have kept this book for a long time and just picked it up and felt that sense of comfort at different times throughout the day. This was the first book for me by this author and Ruth encourages us to walk each day with the One who created all things. She tells us, we become what we behold. It's a beautiful reminder to keep our heart and mind on the good things in life and to look for the good in all things, be it at home or in the smallest details of His creation. I will definitely try this author again!
