

***Please Don't Read This Book* by Deanna Kizis, illustrated by Sam Boughton**

Really, you shouldn't listen to the little paint blob on the cover of the book, even though he's politely requesting for you to not even open the book at all. But if you do open the book to read it, the little blob has rules. However, if you follow all of his rules, you won't have any fun at all! So you should disregard all of the rules, read the book, make goofy noises, make silly faces, and have fun! The art is simple, but it's a great fit for this type of book. *Please Don't Read This Book* is a very short, very silly picture book that I can imagine being the type of book that gets read over and over again in households with really young kiddos, so please do read this book!
