

*The Bookish Life of Nina Hill* by Abbi Waxman

This is an entertaining and amusing account of a young woman who loves books and trivia and working in a bookstore, and little else. She just wants to be left alone, but life won't leave her alone – which leads to many amusing situations. Also, she finds that she is not without relatives, but discovers who her father was and who her many siblings and their children are. All of this enriches her life and leads to some very awkward and funny situations. I recommend this book to people who like something a little different and who love books and reading.
