

*The Secrets of Love Story Bridge*, Phaedra Patrick

By day, Mitchell Fischer worked for the city of Upchester, as a maintenance worker. Right now that meant cutting locks off the five bridges surrounding the small city in north west England. In the evening he took care of his nine-year old daughter, Poppy, and wrote letters to Poppy's mother, Anita. The letters were never sent or read, just deposited in the top drawer of the nightstand in the bedroom she no longer shared. Anita had died three years ago. Even if it wasn't a really happy life, it was one Mitchell felt he could control, at least until he saw the woman fall over the railing of the bridge.

Mitchell wasn't a strong swimmer, but he couldn't see what was happening without reacting. Jumping over the edge of the railing was just the first jump Mitchell would be making if he decides it's time to find life and love again.
