

***You've Got Murder* by Donna Andrews**

Are you able to say that one of your friends is an "AIP"? I can't. "AIP" stands for Artificial Intelligence Personality – here's your introduction to Turing, the AIP who is the main character in *You've Got Murder*.

This is a great cozy mystery that, by chance, I decided to listen to instead of reading the physical book. I highly recommend the audio format for this one.

This AIP was created by a "workaholic techie" who ends up involved in all kinds of intrigue and mystery at the tech company at which he works.

Turing is gradually developing relationships with work colleagues (if you can call them that) as the mystery unfolds. I highly recommend this easy-going offering, and you'll enjoy following Turing as the smartest female PI you'll encounter...for an AIP.
